PROF**T**IT Affiliates API Guide

Brand – GPTtrade
Base URL - https://api.kingsofworld777.com/api/user/v3/
Brand Site URL – https://gpttrade.chat
Campaign ID – 1066
Campaign Name – X2_Team_GPTtrade
Platform ID – 4
Trading Account Group ID – USD:52, EUR:53
Brand ID - 5
API User Name – X2_Team_GPTtrade
API Password – og*0v&AJ

Table Of Contents

PROFTIT

1. New Customer Creation Flow

(Get API User Token ⟹ **Create new Customer** ⟹ **Auto login)**

1.1. Get USER token

To use the CRM API, an API USER token is required. This token is created using the credentials provided to you and is valid for 15 minutes.

```
curl -X POST \
 https://api.kingsofworld777.com/api/user/v3/tokens \
 -H 'cache-control: no-cache' \
 -H 'content-type: application/json' \
 -d '{
   "username": "X2_Team_GPTtrade",
   "password": "og*0v&AJ"
}'
```

Instructions

1. Copy and paste this cURL, change the username and password highlighted in <mark>yellow</mark>.
2. The response will include the token ("jwt" field). **A valid token is required for any request to USER API** (token should be used in request 'Authorization' header)

1.2. Creating a new Lead (Cold Leads)

DISCLAMER:

```
The following steps are crucial for your workflow, depending on the sort of Traffic sent:

If you're sending "Cold Leads" please follow the steps shown in section 1.2, and disregard
section 1.3.
If you're sending "Live Traffic", please follow the steps shown in section 1.3, and disregard
section 1.2.

In addition, please make sure to follow these 2 rules:
*Please make sure to implement a latency of at least 1 second between requests.
*Please make sure to use the same bearer token for all requests as long as it's active (bearer
token will expire in 15 minutes after creation)

In any case where we'll detect the usage of section 1.3 (Live Traffic) with "Cold Leads" data,
we'll need to disable the above API user.
```

Now you can register a new customer using the following request:

```
curl -X POST \
  https://api.kingsofworld777.com/api/user/v3/customers \
  -H 'authorization: Bearer <token>' \
  -H 'cache-control: no-cache,no-cache' \
  -H 'content-type: application/json' \
  -d '{
    "isLead": true,
    "firstName": "test",
    "lastName": "test",
    "email": "XXXX@XXXX.com",
    "countryId": XX,
    "campaignId":1066,
    "brandId": 5,
    "phone": "123234235"
}'
```

NOTES

- *New token should be generated and implemented in 'Authorization' header, this token (in script above) is invalid and expired.*
- *Password complexity- must be at least 5 characters long*

1.3. Creating a new customer (Live Traffic)

DISCLAMER:

```
The following steps are crucial for your workflow, depending on the sort of Traffic sent:

If you're sending "Cold Leads" please follow the steps shown in section 1.2, and disregard
section 1.3.
If you're sending "Live Traffic", please follow the steps shown in section 1.3, and disregard
section 1.2.

In addition, please make sure to follow these 2 rules:
*Please make sure to implement a latency of at least 1 second between requests.
*Please make sure to use the same bearer token for all requests as long as it's active (bearer
token will expire in 15 minutes after creation)

In any case where we'll detect the usage of section 1.3 (Live Traffic) with "Cold Leads" data,
we'll need to disable the following API user.
```

Now you can register a new customer using the following request:

```
curl -X POST \
 https://api.kingsofworld777.com/api/user/v3/customers \
 -H 'authorization: Bearer <token>' \
 -H 'cache-control: no-cache,no-cache' \
 -H 'content-type: application/json' \
 -d '{
  "isLead": false,
  "firstName": "test",
  "lastName": "test",
  "email": "XXXXXX@XXX.com",
  "brandId": "5",
  "phone": "4413468851",
  "countryId": XX,
  "campaignId":1066,
  "productName": "source",
  "marketingInfo": "additionalFunnelInfo",
  "password": "a1234",
  "tradingAccountsForex": [
   {
    "currencyId": 1,
    "isDemo": 0,
    "platformId": 4,
    "tradingAccountGroupId": 52
   }
  ]
}'
```

PROFTIT

COMMON CURRENCIES:

USD - "currencyId": 1, "tradingAccountGroupId": 52
EUR - "currencyId": 2, "tradingAccountGroupId": 53

Use below public requests to get additional currencyIds and countries (USER token NOT required)

https://api.kingsofworld777.com/api/public/v3/currencies
https://api.kingsofworld777.com/api/public/v3/countries

NOTES

  New token should be generated and implemented in 'Authorization' header, this token (in script above) is invalid and expired.
  Password complexity- must be at least 5 characters long
  Creating a Lead will be done as in Section 1.2. *(Creating a customer) while excluding the "tradingAccountsForex" array and changing isLead property to "TRUE"*

PROFTIT

1.4. General Requests

Find below general request to a list of various properties

GET Campaign ID's

```
https://api.kingsofworld777.com/api/user/v3/campaigns/
```

Get Platform ID's

```
https://api.kingsofworld777.com/api/user/v3/platforms/
```

Get Language ID's

```
https://api.kingsofworld777.com/api/user/v3/languages/
```

Get Customer Statuses

```
https://api.kingsofworld777.com/api/user/v3/customerStatuses
```

NOTE - Refer to the "name" property

Get Brand Trading Account Groups

```
https://api.kingsofworld777.com/api/user/v3/brands/5/platforms/4/groups?_expand[]=currency
```

2. New Customer Auto-Login to the Deposit Page

Get Customer Token ⇨ **Redirect to Deposit Page**

2.1. Get CUSTOMER token

The token that is used for the customer's Auto-Login URL

```
curl --location --request POST 'https://api.kingsofworld777.com/api/customer/v3/tokens' \
--header 'Content-Type: application/json' \
--data-raw '{
"email": "XXXXXX@XXX.com",
"password": "XXXXX",
"brandId": 5
}'
```

NOTE – *Take the token from the JWT property to be used in* Section 2.2.

2.2. Redirect customer to deposit page

Now you can redirect the customer to deposit page using the following request:

```
https://gpttrade.chat/#?prfToken=Bearer <token>&prfRedirectUrl=/deposit
```

NOTE – *There's a space between **Bearer** and **<token>** in the above example redirect URL*

Example - *full Auto-Redirect URL:*

```
https://gpttrade.chat/#?prfToken=Bearer
eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJpZCI6MSwidHAiOiJVc2VyIiwibWljcm90aW1lIjoxNjM5NDkwNTgxLjkzODk0
MSwicmwiOjEsInJvbGUiOiJzdXBlciIsInN1YiI6ImFkbWluU3VwZXI5IiwiaXNzIjoiaHR0cHM6Ly9nZXQucHJvZnRpdC5jb20
vliwiaWF0IjoxNjM5NDkwNTgxLCJleHAiOjE2Mzk0OTE0ODEsIm5iZiI6MTYzOTQ5MDU4MX0.Qiht3ESXXkXPerBk6P3Jiy
1vPwV8KVqrS1Fy9JjA3C0 &prfRedirectUrl=/deposit
```

3. Reporting

For reports requests, a valid USER token is required (See Section 1.1).

Get Customers by registration Range

```
https://api.kingsofworld777.com/api/user/v3/customers?registrationDate_gte=2024-05-01 00:00:00&registrationDate_lte=2024-05-31 23:59:59
```

Get Customers with FTD (by FTD date range)

```
https://api.kingsofworld777.com/api/user/v3/customers?sort=ftdDate&_start=0&ftdDate_gte=2024-05-01 00:00:00&ftdDate_lte=2024-05-31 23:59:59
```

Get Call Statuses

```
https://api.kingsofworld777.com/api/user/v3/callStatuses
```

Get Customers by communication date range

```
https://api.kingsofworld777.com/api/user/v3/customers?lastCommunicationDate_gte=2024-05-01 00:00:00&lastCommunicationDate_lte=2024-05-31 23:59:59
```

Get Customers by Last Deposit Date Range

```
https://api.kingsofworld777.com/api/user/v3/customers?lastDepositDate_gte=2024-05-01 00:00:00&lastDepositDate_lte=2024-05-31 23:59:59
```

Get Customer Last Login Date Range

```
https://api.kingsofworld777.com/api/user/v3/customers?lastLoginDate_gte=2024-05-01 00:00:00&lastLoginDate_lte=2024-05-31 23:59:59
```
